Applicant WACKER CONSTRUCTION EQUIPMENT AG						
<ol> <li>This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.</li> </ol>						
2. This REPORT consists of a total of sheets, including this cover sheet.						
<ol> <li>This report is also accompanied by A</li> </ol>	ANNEXES, comprising:					
a. (sent to the applicant and	l to the International Bur	reau) a total of 10	sheets, as follows:			
a. (sent to the applicant and to the International Bureau) a total of 10 sheets, as follows:  sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).						
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.						
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s))						
, containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).						
This report contains indications related.	ting to the following item	ns:				
Box No. I Basis of th	Box No. I Basis of the report					
Box No. II Priority						
	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability					
Reasonal Reasonal	Reasoned விள்ளை எஸ். Added 25(2), with regard to எல்லிர், inventive கூழ or industrial applicability; citations and explanations supporting such statement					
Box No. VI Certain do	Certain documents cited					
Box No. VII Certain de	Certain defects in the international application					
Box No. VIII Certain ob

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement				
1. Statement				
Novelty (N)	Claims	1-36	YES	
	Claims		NO	
Inventive step (IS)	Claims	1, 16	YES	
	Claims	2-15, 17-36	NO	
Industrial applicability (IA)	Claims	1-36	YES	
	Claims		NO	

- 2. Citations and explanations (Rule 70.7)
  - 1. Reference is made to the following document:
    - D1: DE 101 58 266 A (BOSCH GMBH ROBERT)
      26 June 2003 (2003-06-26).
  - 2. The subject matter of claim 2 differs from the tool known from D1 in that "the actuator has a pneumatic suspension in the handgrip, which pneumatic suspension can be variably charged with compressed air, and in that vibration is suppressed largely by means of said pneumatic suspension in the handgrip".
  - 2.1 Although D1 discloses an actuator, said actuator is not more closely defined. A person skilled in the art would therefore have an incentive to take into consideration certain actuators from the field of pneumatic actuators (see column 3, lines 64-66; "the actuator comprises a plunger that can be displaced by means of a pneumatic drive").
  - 2.2 A person skilled in the art would therefore use a conventional pneumatic actuator that comprises

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

an air slug driven by compressed air - in other words the claimed features.

- 2.3 The use of a known pneumatic suspension of this type in a device that is otherwise known cannot be considered inventive.
- 2.4 The actuator disclosed in D1 has a pneumatic suspension in the handgrip, a suspension system 4 being arranged thereupon. Therefore, said pneumatic drive acts to suppress vibration.
- 2.5 The expression "largely" lacks clarity and should not be used by the applicant for delimiting his invention over the prior art (see PCT International Search and Preliminary Examination Guidelines paragraph II-5.34).
- 2.6 The same arguments apply in a similar manner in a similar manner in respect of the subject matter of claim 17.
- 3. Thus, the subject matter of claim 1 differs from the tool known from D1 in that "the actuator has a pneumatic suspension in the handgrip, which pneumatic suspension can be variably charged with compressed air, and in that a suspension system is arranged between the first unit and the second unit in parallel within the actuator.

PCT/EP2004/007743

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;			
	citations and explanations supporting such statement			
3.1	The subject matter of claim 1 is therefore novel (PCT Article 33(2)).			
3.2	The problem addressed by the present invention can consequently be regarded as that of:			
	suppressing vibration largely by means of a pneumatic suspension in the handgrip.			
3.3	The solution to the above problem, as proposed in claim 1 of the present application, is not disclosed in the prior art, nor is it rendered obvious thereby. The subject matter of claim 1 therefore involves an inventive step (PCT Article 33(3)).			
3.4	The same reasoning applies in a similar manner in respect of the subject matter of claim 16.			
4.	In so far as claims 3-15 and 36 are dependent on claim 1, they satisfy the requirements of the PCT in respect of novelty and inventive step.			
4.1	In so far as claims 18-36 are dependent on claim 16, they satisfy the requirements of the PCT in respect of novelty and inventive step.
